

Message

Mahatma Gandhi University Rwanda is an innovative, global and multidisciplinary University with a long tradition in providing excellence in education. It also aims to provide a market oriented, practical and professional education to its students. The University always emphasizes on vocational, practical oriented and functional education which is helpful to its students in a conceptualized way. Education at MGU is student-centric, flexible and industry relevant. MGU curriculum is industry based and updated from time to time to ensure overall development of students.

The University has taken an initiative to make education reach all individuals irrespective of the confines of a classroom and make it available to the interested students. Their focus is to help students realize their full potential and acquire knowledge, values and skill sets and also develop aptitude required for the contemporary world of work.

I appreciate their commendable efforts in bringing value added education in the country. By providing excellent courses and arming students with latest knowledge to face the challenges of globalization the institute has done a laudable contribution to the nation's growth.

I strongly urge all the students to take full advantage of the world class learning environment.

I wish MGU Godspeed and the very best that life has to offer.
